It's About Change

Make a transformation. Work with a consulting team that matches your needs perfectly. A team capable of merging seamlessly with your own workforce, and a team that brings rich industry as well as technical expertise to your projects: Polymorphic Systems, the leader in modern technology consulting.

Our experienced staff is capable of doing anything you ask, from network management to web development. With a diverse background including financial services, healthcare, insurance, printing, and transportation, we will bring critical skills and knowledge to your particular domain. As a result, your company will be able to respond faster to the turbulent market, and stay ahead of the competition.

About Polymorphic

We began Polymorphic Systems Incorporated in 1995 at the start of the internet revolution. Our goal is to provide end-to-end IT services using leading edge tools and techniques. We help you adapt and enhance existing solutions, or work with you to create custom solution. Additionally, we can help with staff augmentation, security, and outsourcing.

Furthermore, we understand that knowledge of a client's industry is every bit as important as in-depth technology expertise.

With Polymorphic, you have access to unparalleled level of industry expertise in addition to our superior technical skills. We've worked with some of the best in domains such as Financial Services, Healthcare, High-tech, Insurance, Printing, and the Transportation industry. As a result, we have a solid grasp of your requirements, dramatically reducing the amount of ramp-up time we need to begin your project.

Technologies

We understand no distinction exists between "mission-critical" software and other software...because when you're running a business, everything is mission critical. Polymorphic will be there at every step to provide your business with the technology you need to gain an edge on your competition, including the latest generation of Microsoft's .NET™ framework, meta-frameworks like DotNetNuke, Silverlight™ and Ajax-based active media, database development with SQL Server™, and intra- and internet solutions built with Sharepoint™.

Polymorphic can work with you to analyze and refine your existing systems, or create powerful new Web 2.0 tools for customer interaction, sales management support, and more.

Staffing

Perhaps you're considering outsourcing while planning a new project, or perhaps your business needs to cut costs. Polymorphic offers a distinctive solution for overseas outsourcing to eliminate the headaches of managing different languages and cultures, as well as the typical issues with communicating requirements and feedback to an offshore team.

Polymorphic will manage this effort for you utilizing our own network of developers. We've built solid relationships, and can offer you a crack team of skilled individuals ready to help with any service you need.

Transform Now

Polymorphic Systems can help you your company reach the very pinnacle. Our clients include acknowledged leaders in their industries:

- **Blue Cross / Blue Shield Insurance:** Projects included an enhanced insurance claim processing system, and sales force support tools

- **Allstate Insurance:** Helped create an enhanced web application for customer self-care.

- **Northern Trust:** Designed and developed custom portfolio management tools and workflow solutions.

- **Go Media:** Created innovative resource management and search mechanism to handle web content and various services for their clients.
